**To: Extraordinary and Plenipotentiary  
Ambassador of the Republic of Uzbekistan  
In Italian Republic Otabek Akbarov**

As you might know, Uzbekistan is currently undergoing large-scale transformations in the field of healthcare. A number of resolutions of the President of the Republic of Uzbekistan have been adopted, which are aimed at fundamental reform of the health system. In particular, by Decree of the President of the Republic of Uzbekistan No. PP-2956 dated May 5, 2017 "About measures to the further reform the system of medical education in the Republic of Uzbekistan" the need for developing proposals for further improvement of the medical education system based on the study of international experience is indicated.

In order to implement the measures defined in this resolution, the Tashkent Pediatric Medical Institute in close cooperation with Sannio University plans to develop a joint inter-university program (joint faculty) to study in the field of medical bioengineering.

Considering that modern healthcare is hard to imagine without the use of advanced information technology and that Italian Republic, and in particular the University of Sannio, holds one of the leading positions in the world in this field, we kindly ask you to provide further support in promoting the planned cooperation. We also kindly request you to meet with Professor Pasquale Daponte within the framework of the Conference "Italy and Central Asia: strengthening mutual knowledge, cooperation and partnership" in December 13<sup>th</sup> at Rome.

**Botir DAMINOV MD, PhD, DSC**  
Professor, Rector of the Tashkent  
Pediatric Medical Institute
